SUMMARY

I am a MERN Stack Developer. Have a good knowledge in programming and computers from my childhood. Hard working, passion, continuously aquiring knowledge is my habit. Creating new ideas and projects give me enjoyment and inspire me a lot.

SKILLS

- **Language:** Javascript(ES6)
- **Tools:** Github, Git, Chrome dev tool, VS code, Heroku, yarn, Netlify
- **Comfortable:** React, MongoDB, NodeJs, ExpressJS, Context API, Firebase, npm
- **Familiar**: SCSS, Redux, Stripe(for payment),Typescript, React Native, REST API

PROJECTS

1. **Travel Agency - Trip Booking Website**   07 2021 - 08 2021

   Features:
   - User can book any trip and payment by stripe
   - User can login with google or email and password and write review about service
   - User can review booking list
   - Admin can add service, Admin can delete service
   - Admin can add and delete an admin
   - Admin can access extra admin dashboard

   Technology Used:
   - **Front-end**: Javascript(ES6), React, Bootstrap, Material UI, Context API and many libraries
   - **Back-end**: NodeJS, ExpressJS, Heroku(for deploy)
   - **Database**:MongoDB
   - **Authentication**: Firebase

   Live Site: https://car-repair-d58cb.web.app/
   Source Code:
   - **Client Code**: https://github.com/kamrulhasan62579/car-repair-client
   - **Server Code**: https://github.com/kamrulhasan62579/car-repair

2.**Doctors Portal - Dental Clinic Website**   12 2021 - 13 2021

   Features:
   - Patients can book an appointment and view appointments

- Patients can login with google or email, password
- Admin can access extra dashboard and can add new doctor
- Admin can delete and add dental service and admin has many options

Technology Used:
- **Front-end**: Javascript(ES6), React, Bootstrap, Material UI, Context API and many libraries
- **Back-end**: NodeJS, ExpressJS, Heroku(for deploy)
- **Database**: MongoDB
- **Authentication**: Firebase

Live Site: https://doctors-portal-3d32d.web.app/
Source Code:
- **Client Code**: https://github.com/kamrulhasan62579/doctors-portal-client
- **Server Code**: https://github.com/kamrulhasan62579/doctors-portal-server

3.Fresh Valley - Organic Shop Website   17 2021 - 18 2021

Features:
- User can buy organic food and payment by stripe
- User can login with google or email and password
- User can review order list and Admin has many options

Technology Used:
- **Front-end**: Javascript(ES6), React, Bootstrap, Material UI, Context API and many libraries
- **Back-end**: ExpressJS, NodeJS, Heroku(for deploy)
- **Database**: MongoDB
- **Authentication**: Firebase

Live Site: https://fresh-valley-1.web.app/
Source Code:
- **Client Code**: https://github.com/kamrulhasan62579/fresh-valley-1-client
- **Server Code**: https://github.com/kamrulhasan62579/fresh-valley-1-server

COURSES
1. **Complete Web Development Course With Jhankar Mahbub** from Programming Hero
2. **Responsive Web Design** from free freecodecamp
